Summary

Experienced Software Developer with expertise in .NET (C#), React, JavaScript, and Azure-based applications. Skilled in designing and developing scalable web applications, cloud deployments, database optimization, and Agile development (Scrum/SAFe). Passionate about delivering high-quality, user-centric software solutions.

Experience

Software Developer | Christ City Global Outreach International

Nov 2022 - Jan 2025 | Abuja, FCT, Nigeria

- Developed and maintained .NET backend services using C#, ensuring high performance and scalability.
- Built React/Next.js frontend components using TypeScript to improve user experience and interactivity.
- Deployed and managed applications on Azure cloud, leveraging cloud storage, computing, and security tools.
- Optimized MS SQL database queries and integrated Elasticsearch for indexing and fast search operations.
- Implemented RESTful APIs and microservices architecture, ensuring seamless communication between frontend and backend services.
- Worked within an Agile Scrum/SAFe framework, actively contributing to sprint planning, backlog refinement, and code reviews.

Software Developer Intern | Hope Up Integrated Services

May 2020 - Sep 2022 | Rivers State, Nigeria

- Developed web applications using C#, .NET Core, and JavaScript frameworks (React, Next.js).
- Utilized GitHub for version control and collaborated in a Scrum team environment using Jira.
- Worked on API modeling and integration, ensuring secure and efficient data exchange between services.
- Assisted in cloud-based application deployment and infrastructure monitoring using Kibana & Datadog.
- Participated in code reviews and software documentation using Confluence.

Education

B.Sc, Business and Economics | Sikkim Manipal University | 2018 - 2022

Web Programming with Python - CS50 | HarvardX | 2023 - 2024

Introduction to Blockchain and Web3 | HarvardX | 2024

Technical Skills

- .NET (C#), ASP.NET Core
- React, Next.js, TypeScript, JavaScript
- Azure Cloud Services, MS SQL, Elasticsearch
- API Development (RESTful, Microservices)
- Git, GitHub, CI/CD Automation
- Cloud Monitoring (Kibana, Datadog)

- Agile Methodologies (Scrum, SAFe, Jira)
- Software Documentation (Confluence)

Achievements

- Developed React-based web applications that improved user engagement by 35%.
- Optimized database queries, reducing API response time by 30%.
- Implemented Azure-based cloud deployments, improving system scalability and reliability.
- Led API integration efforts, ensuring seamless data exchange across multiple services.
