Summary

Experienced Backend Engineer with 5+ years of expertise in Python development, API architecture, cloud deployment, and asynchronous processing. Proficient in building and optimizing scalable backend services using Django and FastAPI, designing RESTful APIs, and ensuring system security and reliability. Adept at cloud infrastructure management (AWS, Azure), authentication mechanisms (JWT, OAuth), and container orchestration with Kubernetes.

Experience

Backend Engineer | Christ City Global Outreach International

Nov 2022 - Jan 2025 | Abuja, FCT, Nigeria

- Designed and optimized backend services and APIs, improving system reliability and scalability.
- Developed and maintained robust backend services using Python, Django, Django Rest Framework (DRF), and PostgreSQL.
- Implemented authentication & authorization mechanisms using JWT and OAuth2 for API security.
- Integrated messaging queues such as RabbitMQ and developed asynchronous tasks using Celery.
- Implemented cloud solutions on AWS (EC2, S3, Lambda) for scalable deployment.
- Deployed containerized applications using Docker and Kubernetes.
- Designed and documented API endpoints using Swagger for better developer accessibility.

Backend Developer Intern | Hope Up Integrated Services

May 2020 - Sep 2022 | Rivers State, Nigeria

- Built and optimized RESTful APIs, ensuring secure and efficient data transactions.
- Implemented automation solutions using Robotic Process Automation (RPA) to streamline business workflows.
- Integrated third-party APIs for medical billing and insurance claim automation.
- Implemented comprehensive unit testing with pytest and CI/CD workflows using GitHub Actions.
- Provided Level 3 support, diagnosing and resolving backend issues in production systems.

Education

B.Sc, Business and Economics | Sikkim Manipal University | 2018 - 2022

Web Programming with Python - CS50 | HarvardX | 2023 - 2024

Introduction to Blockchain and Web3 | HarvardX | 2024

Technical Skills

- Python, Django, Django Rest Framework (DRF), FastAPI
- SQL, PostgreSQL, MySQL
- API Architecture (RESTful, WebSockets, Swagger)
- RabbitMQ, Celery, Asynchronous Processing
- Docker, Kubernetes, Cloud Deployment (AWS, Azure)
- Authentication & Authorization (JWT, OAuth2)
- Git, GitHub Actions, CI/CD
- Unit Testing (pytest, unittest)
- Familiar with Frontend Technologies (HTML, CSS, JavaScript)
- Production Troubleshooting & L3 Support

Achievements

- Developed and maintained scalable backend services, improving system efficiency.
- Implemented automation solutions that reduced manual processing time by 40%.
- Integrated secure and optimized third-party APIs for medical billing.
- Optimized API response times by 30% by improving database indexing and query efficiency.
- Successfully deployed containerized applications using Kubernetes, improving system scalability and resilience.
